

## LBX Announces Link-Belt® LSG Series and LCG Series Work Tools

February 26, 2020 (Lexington, KY)

LBX Company LLC, Lexington Kentucky announces Link-Belt® LSG Series Scrap Grapples and LCG Series Contractor Handling Grapples, designed for scrap handling, construction & demolition sorting, and bulk material handling.

### LSG Series Work Tools:

The Link-Belt Scrap Grapple is a low-maintenance, high-capacity orange peel grapple designed for high volume scrap yard processing. Available in four models, the LSG features:

- Reverse-mounted cylinders protect rods from damage
- Multiple tine and spade styles for all types of scrap material
- All tine styles feature fully-boxed construction for strength and durability
- Overall footprint easily fits inside trailers
- A heavy-duty guarding system that completely protects cylinders and internal components yet is easily removed for maintenance
- Identical hardened steel bearings with dust seals at all pivot points that protect against external debris
- Large bore hydraulic cylinders for maximum clamping force
- High-torque continuous 360-degree rotation
- Abrasion-resistant steel tips that are easily replaced with a simple perimeter weld

## LCG Series Work Tools:

The LCG is available with perforated or heavy-duty ribbed tines that close at a very flat angle to assist in compacting material. Maximum crushing force densifies material while the strong rotation system resists back-driving forces. Available in three models, the LCG features:

- Single cylinder with dual drag links minimizes the number of moving parts and simplifies the hydraulic system
- Streamlined tine, frame and linkage design with easy-to-locate grease fittings simplifies maintenance
- Oversized cylinder design incorporates rod protection, maximum crushing force to densify material, bolt-on gland cap for durability, and easy maintenance
- Large recessed side covers provide easy access to internal components while protecting the cover fasteners

Perforated Tines

All LSG and LCG tools are covered by a full 1-year/1800-hour (whichever occurs first) Standard Limited Warranty; warranty will be honored on tools mounted on Link-Belt excavators only.

## About LBX Company

LBX Company LLC offers a full line of Link-Belt hydraulic excavators—including standard, long front & minimum swing configurations—from 8 to 80 metric tons, along with scrap and material handlers, forestry machines and work tools. Link-Belt machines and work tools are available through an extensive network of dealers in North and Latin America. LBX's subsidiary company, LBX do Brasil, distributes these products in Latin America. LBX Company is a wholly owned subsidiary of Sumitomo Construction Machinery, a worldwide leader in construction equipment innovation and quality manufacturing based in Chiba, Japan.
